

UCM425 & UCM300

Advantages over Previous Models

Previous Moduls;UCM2000 & UCM3000

New Versions; UCM425 and UCM300

- The guillotine and folder are now driven by servo motors, increasing the speed of the machine by 25%.
- The machine is now quieter and comes equipped with fully integrated dust extraction.
- The blades of the guillotine are now carbide and have 4 cutting edges. This means the blades are cheaper and they can be rotated 4 times before the need to replace/sharpen.
- Machine now has an industrial Bekhoff touch screen monitor.
- The machine now has a rubberised upper roller and clamping mechanism resulting in less stress on the material and lower core loss (if not annealing). Customers are reporting 2-3% improvement.
- We now offer the 425mm wide model which can process 2 strips of 210mm strip simultaneously.
