

Capacitor - EJ-5/EJO-5 9F60

Description

Backup Capacitor current-limiting fuses are designed for individual capacitor protection. The EJ-5 is designed for use indoors or inside an enclosure only. The EJO-5 can be used in any location (indoor or outdoor). The major purposes of such fusing are: (a) to protect the systems from failed capacitor units, and (b) to prevent damage to adjacent capacitors and associated equipment.

Features and Benefits

- High interrupting capacity.
- Noiseless operation.
- Fast current-limiting operation.
- No vents or special reinforced compartments required.

Product Scope

- From 5.5 to 9.52kV
- From 8 to 80A
