

Fuse Supports - EK-1/EKO-1 9F61

Description

Mountings of the non-disconnecting type are available. They are used primarily in potential transformer circuits, or where there is some other disconnecting or isolating device in series with the fuse in the circuit. Fuse supports can be mounted vertically or horizontally. The EKO-1 models are designed to be installed outdoors.

Product Scope

- Indoor and outdoor models.
- From 2.75 to 38kV
- From 60 to 200 BIL (kV)
