

## Power - EJ-1/EJO-1 9F60

### Description

Backup power distribution current-limiting fuses are designed not only to interrupt the high-fault currents but also to interrupt low-fault currents down to approximately 3 times their continuous rating. The EJO-1 models can be used outdoors without any protecting enclosure.

### Features and Benefits

- High interrupting capacity
- Noiseless operation
- Fast current-limiting operation
- No vents or special reinforced compartments required

### Product Scope

- From 0.625 to 38kV
- From 0.5 to 200A
